

ITALY

2 NIGHTS ROME + 2 NIGHTS VENICE

About Venice

Architecture of Venice

- There are over 450 palaces (palazzi) in Venice.
- Buildings and palaces in Venice are built in a mixture of styles: Byzantine, Baroque, Gothic etc.
- The famous San Marco bell tower, or campanile, was built in the 12th century and collapsed in 1902. The tower was rebuilt to be exactly the same as the previous one. It is 98,6 metres tall, which makes it fifth tallest bell tower in Italy. Some say that the best view of Venice is from the tower.
- There are millions of wooden piles under the Venice lagoon.
- Venice was not built directly on the surface of the islands, buildings are supported by wooden platforms.

Gondolas of Venice

- One of the most recognizable symbols of Venice are gondolas. Not everyone thinks about things like how they are made while enjoying their ride, but that is actually an interesting story: each gondola is made of eight different types of wood. Left side is bigger than the right one for 24 centimeters (almost a foot), and the parts of gondolas are symbols of some parts of Venice – front part represents six city zones, back part represents island Guideka, and the central part represents famous Rialto bridge.
- Best time to visit from April to June and September to October (spring and fall)

About Rome

About Rome

- Rome, Italy's capital, is a sprawling, cosmopolitan city with nearly 3,000 years of globally influential art, architecture and culture on display. Ancient ruins such as the Roman Forum and the Colosseum evoke the power of the former Roman Empire. Vatican City, headquarters of the Roman Catholic Church, boasts St. Peter's Basilica and the Vatican Museums, which house masterpieces such as Michelangelo's Sistine Chapel frescoes.

Architecture of Rome

- Ancient Roman architecture adopted certain aspects of Ancient Greek architecture, creating a new architectural style. The Romans were indebted to their Etruscan neighbors and forefathers who supplied them with a wealth of knowledge essential for future architectural solutions, such as hydraulics and in the construction of arches. Later they absorbed Greek and Phoenician influence, apparent in many aspects closely related to architecture; for example, this can be seen in the introduction and use of the Triclinium in Roman villas as a place and manner of dining.
- Best time to visit from April to June and September to October (spring and fall)
