# Overview

Shanghai is unique in its cultural division between Pudong and Puxi, the city's two main neighbourhoods. These opposing parts of town—named after their location in relation to the Huangpu River, with "*dong*" meaning east and "*xi*" meaning west—are completely different culturally as well as geographically.

## **PUXI-**

- Pronounced "poo shee," Puxi is the historical heart of the city.
- It is in this area that the historical houses and buildings (or what's left of them), the Bund, and the famous Art Deco heritage architecture are found.

## **PUDONG-**

- Just a few decades ago, Pudong was home to a slew of warehouses as well as farming and fishing communities. Now, it is home to some of the tallest buildings in China, such as the Shanghai Tower and the Shanghai World Financial Center.
- Whereas Puxi is somewhat of a blast of Shanghai's past, Pudong is a glimpse into its future. The distinction between the two cities is almost alarming as you look out across the Huangpu River at the opposing skyline.
